

COMPANY INSIGHTS

Gain insights for your next research project

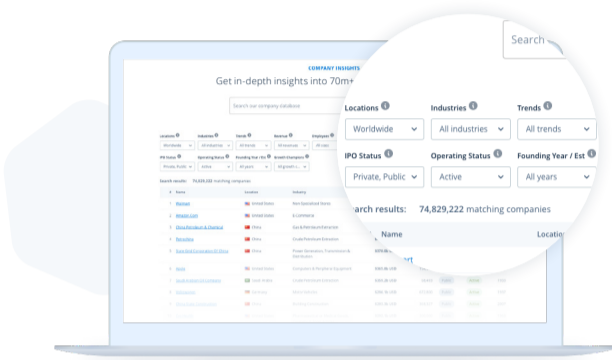

Your challenge

It can be difficult to find the relevant business metrics for your research if the appropriate data source is missing. A lot of time is usually spent searching for information, yet sources are often incomplete or don't meet the requirements needed for your project.

Our solution

Company Insights provide exclusive data for **over 70 million privately held** and **50,000 publicly listed companies worldwide** and give you a comprehensive source of business information. With our advanced filtering options, you can tailor and customize the data based on industries, countries, trending markets, and more, so you'll find exactly what you need for your research project.

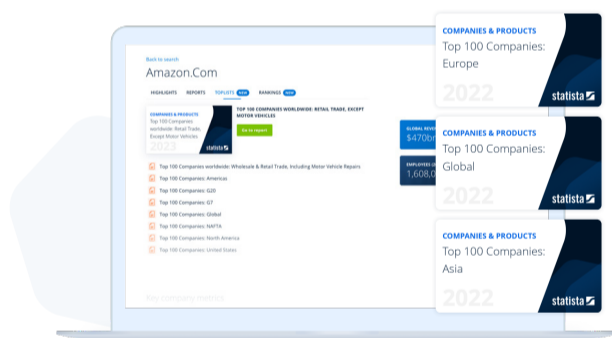

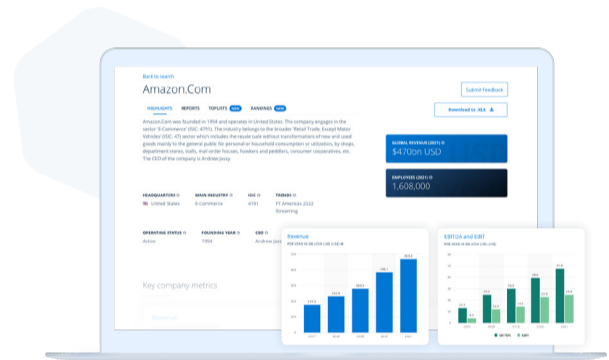

Customizable search and filter

Narrow down your search by country, industry, company size, and more to find the company data you need in minutes.

Detailed company figures and historical data

In our company profiles, you'll find contact details and over 20 KPIs covering relevant profitability, liquidity, and stock performance measures for stock-listed companies.

Company data to download

Download the top companies or entire company profiles as Excel files for further analysis of the data.

Your benefits

- **Save** a significant amount of **time** when researching
- **One source** for all the data you need
- **Easily identify** companies within trends
- **Customize data** to fit your individual research goals
